### **DETAILED ACTION**

1. This is in response to the Applicant's arguments and Terminal Disclaimer filed on December 14, 2005 in which claims 1, 3, 5, 7-13, 16, 18-20 are currently pending.

#### ***Allowable Subject Matter***

2. After a further search and thorough examination of the present application and in view of the applicant's arguments and Terminal Disclaimer, claims 1, 3, 5, 7-13, 16, 18-20, renumbered as 1-14, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the prior art teaches a memory coupled to the processor and the first and second indicators shared the wireless card and the fixed network.

On the other hand, the Applicant teaches, inter alia, a status processing logic circuit coupling the wireless card and the fixed network controller to the first and second indicators such that the first indicator indicates network activity, wherein the second indicator includes first and second sub-indicators for indicating different link rates, respectively, and the status processing logic circuit drives the first indicator to indicate a first link rate when the system is operating at a first link rate and drives the second indicator to indicate a second link rate when the system is operating at a second link rate. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
